ON-SITE PERSONAL MEDICAL

Taking Safety to the Next Level

YMH stands in the middle between employer and employee as a mutually beneficial veil to reduce corporate liability and improve employee health. As a trusted third party with expertise in Occupational Medicine we align everyone's interest to produce a healthier work environment.

YOUR MEDICAL HOME

COMPLETE CARE FOR THE COMPANY AND THEIR EMPLOYEES UNDER ONE ROOF

Local Providers

We understand that working hard and showing up for family leaves little room to prioritize one's health. It's common to ignore symptoms until a larger problem ensues. Knowing this can be costly for individuals and their employers, we have taken the time to develop an easy and effective solution with our On-Site Primary Care Services.

Companies delivering wellness services to their employees to maximize their days off and increase productivity is nothing new. For decades we've seen gyms in the workplace and flu shots delivered at the office. Post pandemic telehealth access for employees is considered an absolute must, even though the services are underutilized. We understand that the barrier to telehealth being an effective preventative tool is due to the lack of established relationship and consistency between the patient and the provider.

We have done our homework and solved for all of these by having local providers regularly on-site to establish a relationship and implement continuity of care for your employees.

Bringing Medical On-Site

- Acute Care
- Health and Wellness Consults ADHD / ADD
- IV Hydration
- Referrals
- Fit For Duty

- X-Rays
- DOT Physical
- Random Drug Screens
- Medical Records

Smarter Health and Safety Prevention

Corporate Social Responsibility

Today's standards for Corporate Social Responsibility are being embraced because of the positive results derived from the initiatives they foster. **Companies have options when it comes to protecting employees and preventing recordables. Preventative Healthcare programs like our On-Site Medical Services is one that offers value based care, which is commonly known to improve one's health.**

Companies embracing successful health and safety programs stand to reap cost savings attributed to injuries and illnesses often stemming from postponed healthcare and work-related fatigue.

These benefits include diminished workers' compensation expenditures, lowered medical outlays, and increased productivity.

Employees give a lot to their employer and attracting quality employees is easier when they know the company is willing to invest in their personal health and safety.

- 7,500** global daily deaths due to unsafe and unhealthy working conditions
- ~85%** of serious injuries and accidents are attributed to human error or negligence
- \$250B** is spent annually in the US on job related injuries, illnesses and fatalities
- 68%** of workers globally do not feel completely safe working in their employer's buildings (post- covid)
